SMARTPLUG APPROVED TO CONDUCT BUSINESS WITH DEPT OF DEFENSE

After finding success in the marine and emergency vehicle markets, SmartPlug has recently been approved to conduct business with the US Department of Defense. The company's innovative products are now eligible to be listed in the United States Military Purchasing Directory (USMPD).

The USMPD is distributed to all military bases and installations of the Department of Defense during the first quarter of the US government's fiscal year. Only commercial vendors who are registered in the Central Contractor Registry are able to be sold through the USMPD.

The SmartPlug is a revolutionary shore power system designed to replace the outdated and problematic twist-type design in use today. It's intuitive to use and provides greater protection against loose connections and corrosion, the leading causes of shore power failure and fires.
